Orwell 1984: health is sickness, treatment is God, causes usually ignored

Drug only 'solution', food is dismissed, ***vaccines became: a major religion***

Disease as:
1. an (injected) Toxin or 2. an (ingested) Lack

By following UK Eatwell, or 'official' US MyPlate, Guides: *diabetes* is rampant
A possible FOOD Guide: <https://www.youtube.com/watch?v=B6gExJlkaK4>

Ingested food goes (safely) via stomach, but injected proteins cross the blood brain barrier, creating permanent allergies, when bound to vaccine adjuvants

Injected toxins go everywhere while increasing the bodily load. Mitkus study 2011 was on orally ingested, 97% excreted, but injected proteins don't dissolve.

When Medics Resist Open Debate

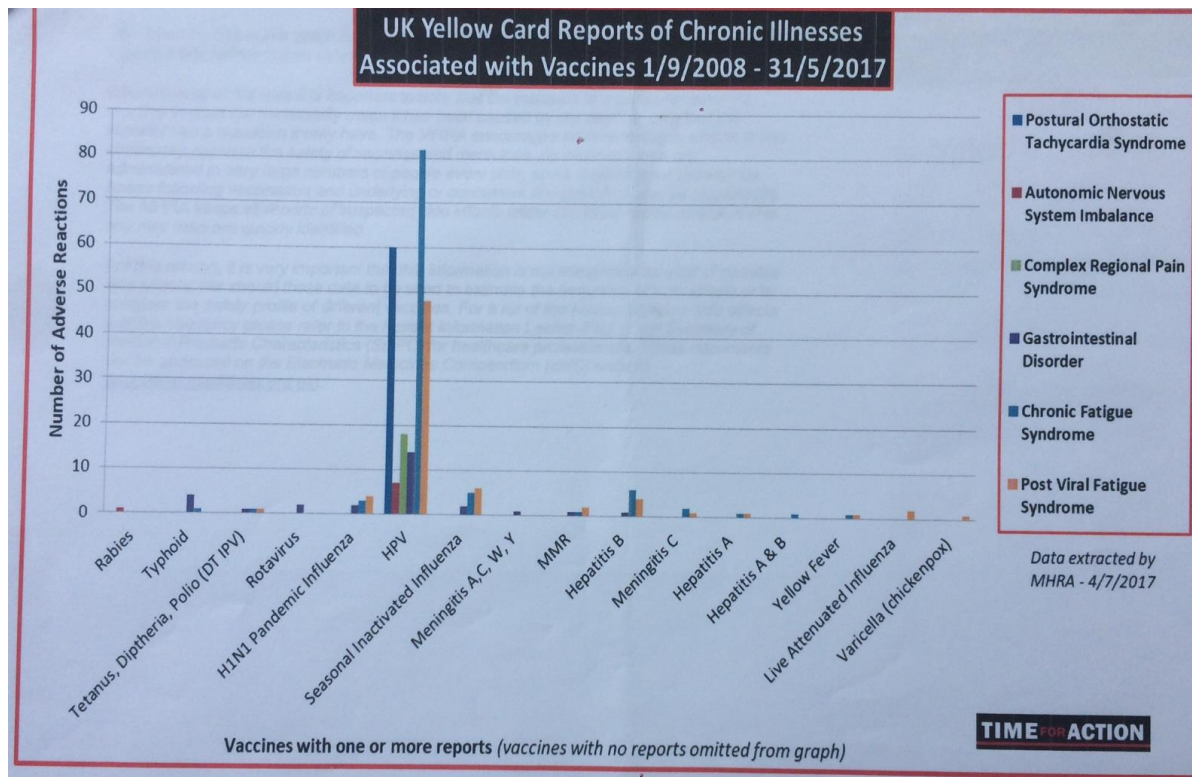

See above - so, you're saddled with me today.

Debate deniers here include: DHSC, Public Health, GP's, Consultants.

"It's career suicide to raise a vaccine adverse effect. Not 1 in 100 harms are officially reported".

"Can we just attend but not speak, nor be filmed".

Quote:

'Parents sometimes worry that their child's immune system will not be able to cope with receiving several vaccines at once. In fact, even a tiny baby's immune system can cope easily. From birth onwards, a baby comes into contact with millions of germs every day. Babies' immune systems are working all the time to protect them against bacteria and viruses in the environment. Vaccines represent a very small challenge to the immune system when compared to this'.

But not injected metals, animal cells and other toxins...

When Pathologists Go Rogue: told to just “shut up”

Dr Johan Misliwetz, Vienna Pathologist, examined HPV vaccine deaths “**I was told to stop talking about HPV vaccination deaths - I’ve done thousands of autopsies**, but never experienced anything like this”. Dr Misliwetz took early retirement.

Dr Sin Hang Lee - Scottish Parliament Presentation in Oct’ 2015
“PAP smearing is far more effective – ***HPV vaccination is a 30 year experiment***”.

Let The Experts Speak

Question: Why have we seen NO Fall in Cervical Cancer rates?

Answer from a UK (university) HPV expert: “we will any day now” ...

National Immunologist “I wouldn’t give my daughter Gardasil because of the aluminium adjuvant”. (Gardasil 9 has 2x aluminium of Gardasil).

Gardasil 9: Sons and Daughters – Warning Labels

Gardasil 9 is a black triangle product. It IS still under scrutiny for post marketing side effects

Is GARDASIL is being promoted to protect against Head, Neck and throat cancers. These are OFF LABEL RECOMMENDATIONS. The manufacturer does not make these claims, refer to PIL.. To the best of my knowledge the clinical trials have not been carried out to support these claims.

Gardasil v Gardasil 9: See: Patient Information Leaflet (PIL)

Page 8: 2.5% Serious Adverse reactions following Gardasil, while following GARDASIL 9 they are 2.3%

Page 9: Systemic autoimmune = **3.3% harms** following Gardasil

Risk of cervical cancer (Cancer Research UK) is 0.6%. So NNT is 166. **HPV is not needed for: 165 out of 166 girls** (even if the vaccine had ever been proven in trials to prevent cancer).

Trials Harms Cut Off versus Efficacy timing Clinical Trials

No (true) placebo: aluminium versus aluminium, true harms are hidden

Trial harms only noted for **15 days**, yet for a **four decade** 'active' vaccine

NEVER proven to prevent cancer. Only healthy trialists, others excluded.

An Upwards only, Official Vaccine Schedule

300 vaccines coming along in the pipeline, begging to be 'mandated'....

1960's vaccines in: 5 doses: In the US now it's: 72 doses between birth & 18 years old.

Get a 'girlie' magazine put it in the loft for three years, whatever is in it will be the next *disease mongered*, must have: *drug / device / vaccine*.

Half the 'development spend' is on marketing (not research).

When Doctors Go Rogue

Physicians For Informed Consent, against California's legally mandated vaccination schedule, SB 277.

Urban Myths: Chemo, Statins, Paracetamol, Ibuprofen, Roaccutane

Urban 'myths' no... but harms: ignored and covered up.

Follow the Money

Vaccine market, has expanded 13 fold \$\$\$ / £££ in 30 years

Since 1985 manufacturers are *'immune'* from Prosecution...

US Vaccine compensation fund has paid out \$3.5 billion, since 1986 through their private court but 3 year statute of time limit

\$65 million paid in HPV vaccine harms. Boys will increase that.

FDA & HPV: *'Regulatory Capture'* (1 of 2)

FDA website in 2003: *'Infections caused by HPV (human papilloma virus) actually cause no danger in healthy women and are usually short lived'*. Disease mongering, perhaps:

It's *tempting for some*: \$2 billion sales - HPV vaccine \$4 / dose to make, but sells for \$90/\$120: THREE doses 'needed'

Vaccinated versus UnVaccinated, there is only The Anthony Mawson study: the CDC said to “retract it or else it would harm Public Health”. **So, it was ‘retracted’... BUT view IT here:**

MMR was the first **TRIPLE**, live virus vaccine. The first new UK NHS vaccine in 20 years. Dr Paul Thomas, Ohio Paediatrician starts MMR at age three: then: **autism goes away**. Dr Richard Halvorsen (Author Vaccines a Parent's Guide) offers individual M, M and R vaccines at his BabyJabs Clinics in UK: in Manchester and London. **But the NHS offer no single M, M, or R vaccine options. Compare the outcomes?**

HPV Vaccine Events: 3rd and 4th December 2018

1) Monday 3rd December 2018 Book launch - **Manx Museum, Douglas: *The Emperor Has No HPV Vaccines***, author Courtenay Heading. (There is such a thing as a free launch) but there is NO such thing as a free book (it's: £10.00).

2) Monday 3rd December 2018 **Dr Chris Exley**, Evening Presentation: *aluminium adjuvants in vaccines*. In attendance on: 3rd and 4th Dec, US based, **Dr Sherri Tenpenny**

3) Tuesday 4th December, Parents Presentations, Douglas, Isle of Man: Showing of **VAXXED the film** - introduced by the Mother of an HPV vaccine damaged girl.
